

### Component 4: Project Implementation

4.2 Support small initiatives for Community Based Organizations & NGOs, with particular attention to women, that enable them to better use/optimize natural resources to generate economic, social and environmental benefits and in the process, enhance women's role in sustainable development. Implement the value chain socio-economic projects within municipalities in partnership with Community Based Organizations & NGOs.

<p><b>Project Description:</b> Installing a PV system and renovating a water well for Voice of the Child in Monastir to reduce their annual spending on electricity and water. Generated savings will be used to support the Birbasha (Women working in plastic waste sorting) by providing them with essential items that will ensure their safety while working. The Birbasha women make their daily living by collecting, sorting, and selling plastic waste, but face a large number of issues mainly from constant exposure to trash fumes. VOC will support them by providing vaccinations, safety equipment, uniforms, and motorcycles for transportation. And will benefit them by hosting them in the organization and allowing them to sell their plastic at a single point.</p>	<p>Location: Monastir, Tunisia</p>
<p><b>Implementers &amp; contracting Authority:</b> Horizons for Green Development</p>	<p>Project/Tender No: Agreement not signed yet</p>
<p><b>Executed By:</b> Voice of the Child</p>	<p>Projected Fund: MINARET and future contribution by VOC</p>
<p><b>Consultant:</b> Tender not issued yet</p>	<p>Estimated Project Cost: USD 20,000</p>

Actions	Preliminary Timeframe				Deliverables
	Q4/19	Q1/20	Q2/20	Q3/20	
1. Signing agreement with VOC and tendering					Signed contract, issued tender for PV system, received offers for water well renovation.
2. Implementing renovations and procuring required items for the center					Completed water infrastructure works / installation of PV system
3. Initiate staff training and capacity building of VOC staff					Training will follow the capacity building plan and will range from operation/maintenance of the PV system and water well to food production.
4. Initiating operational processes.					Once the PV system is installed and the water well is ready, begin utilizing the savings to support the Birbasha women.
